# How to Configure VPN Connection to SH/SZ Office
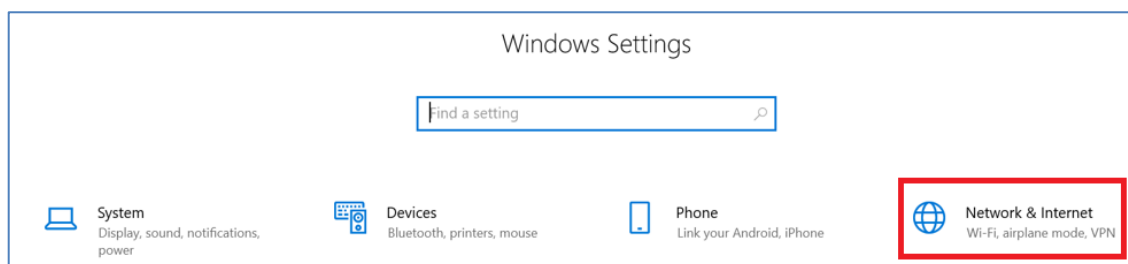

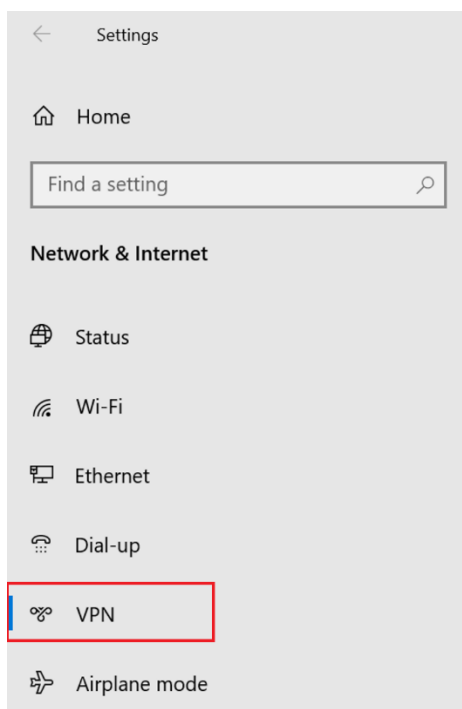

1. Go to Windows 10 Start -> Settings

2. Click "Network & Internet"

3. Click "VPN"

4. Click "Add a VPN connection"

5. Fill the blanks as below screenshot and "Save"

In the "Server name or address" field, please fill address with below

info.

Shanghai Office VPN Gateway:    sh-office.armchina.com

Shenzhen Office VPN Gateway:    sz-office.armchina.com
Type **L2TP** in the "Pre-shared key"

6. Once complete VPN creation, please go to "Ethernet".

7. Click "Change adapter options".

8.  Right Click the VPN connection just created and Click "Properties".

9.  Click "Security", choose "Allow these protocols", check "PAP" and
    "CHAP"

10. Choose the VPN Connection you created and type your domain

account name and password to connect it.

Your "User name" likes abcxyz01 ("abc" is the first three characters of

first name, "xyz" is the first three characters of last name)

11. If VPN connection does not connect successfully through below

steps.

Please try another way (see below) to connect VPN.

**arm CHINA**
